Khaled Morsi

Senior Full Stack PHP Developer | Laravel & WordPress

Giza, Egypt | +20 109 150 7564 | khaledzaki370@gmail.com | linkedin.com/in/khaledz370

PROFESSIONAL SUMMARY

Full Stack PHP Developer with 6+ years of experience building and scaling production Laravel and WordPress systems, including backend APIs serving 96,000+ registered users and 20,000+ daily active users. Specialized in backend architecture, SaaS and multi-tenant platforms, RESTful APIs, and performance optimization using Redis caching, queues, and database indexing. Author of published WordPress plugins and open-source Laravel packages. Strong in OOP, SOLID principles, design patterns, secure authentication (JWT, OAuth2), CI/CD, Docker, and Linux server management. Uses AI-assisted development to ship features faster while maintaining code quality.

PROFESSIONAL EXPERIENCE

Full Stack PHP Developer Mar 2020 – May 2026

Codenesslab **Cairo, Egypt**

- Led backend architecture and system design for Laravel applications and RESTful APIs serving thousands of active users, focusing on scalability, high availability, and performance.
- Architected the Laravel backend for the **MyCIC mobile app**, serving 96,000+ registered students and 20,000+ daily active users; used Redis caching, queue-based processing, database indexing, and event-driven notifications (Observer pattern) to keep the platform stable during peak traffic.
- Built ERP and CRM systems, including a multi-tenant CRM with full client data isolation, role-based access control (RBAC), and modular customization.
- Developed a multi-tenant **Chatbot SaaS dashboard** in Laravel with client management and module-level permissions.
- Engineered an **AI-powered live chat WordPress plugin** with agent workflows, chat queue management, predefined question flows (Strategy pattern), and third-party API integrations.
- Built the Laravel backend for the **We Achieve mobile app**, including live challenges, reminders, podcasts, sessions, push notifications, and real-time features.
- Applied OOP, SOLID principles, and Repository, Service Layer, Factory, and DTO patterns to decouple business logic and improve testability and maintainability.
- Modernized legacy PHP systems to current Laravel standards by extracting service classes, removing duplication, and introducing design patterns.
- Secured applications with JWT and OAuth2 authentication, authorization layers, and data protection practices.
- Developed and optimized the **Optizi / Yalla Buy** WooCommerce store and built custom WordPress REST APIs for mobile app integration.
- Managed production Linux servers, deployments, SSL, DNS, and hosting with Nginx, Apache, and Plesk; maintained, secured, and optimized WordPress sites for CIC Cairo, Codeness Lab, and IGS Partners.
- Accelerated feature delivery with AI-assisted development (Claude, GitHub Copilot, OpenCode) and prompt engineering.

TECHNICAL SKILLS

Languages: PHP 8+, JavaScript, SQL, HTML5, CSS3

Frameworks & CMS: Laravel 10+, WordPress, WooCommerce, Elementor

Databases: MySQL, PostgreSQL, MongoDB, Redis

APIs & Security: RESTful APIs, JWT, OAuth2, Authentication & Authorization, RBAC, Secure Coding, SSL, Cloudflare

Architecture: System Design, SaaS, Multi-Tenant Architecture, Real-Time Systems, Caching, Queues, Database Optimization & Indexing, High Availability, Horizontal Scaling

Principles & Patterns: OOP, SOLID, Repository, Service Layer, Factory, Singleton, Observer, Strategy, DTO

DevOps & Tools: Git, GitHub Actions, CI/CD, Docker, Linux, Nginx, Apache, cPanel, Plesk, aaPanel, HestiaCP

AI: AI Integration, Chatbots, AI-Assisted Development (Claude, GitHub Copilot, OpenCode), Prompt Engineering

PROJECTS & OPEN SOURCE

kz370/jwt-auth – Open-Source Laravel Package
JWT authentication package for Laravel APIs with token rotation and refresh token flows, built with OOP, SOLID principles, Service Layer, and Factory patterns.

kz370/krayin-multi-tenancy – Open-Source Laravel Package
Multi-tenant architecture package for Krayin CRM enabling scalable deployments with secure client data isolation; uses Strategy pattern for tenant resolution and Repository pattern for data access.

AnyPage Header Footer for Elementor – Published WordPress Plugin
Per-page custom header and footer templates with Elementor support, centralized template management, real-time duplicate validation, and safe theme fallback for all public post types.

Kzdev String Translations for Polylang – Published WordPress Plugin
Translates dynamic frontend strings (cart widgets, checkout fragments, AJAX and JavaScript-injected content) using a MutationObserver real-time engine, CSV import/export, and an optional AI translation helper.

KEncrypt – Open-Source PHP Extension
PHP extension for encrypting and obfuscating PHP source code in production environments.

Ellyentaayzo Store – WooCommerce Store and Mobile App
Arabic/English WooCommerce store with a customer mobile app featuring OTP sign-in, cart, checkout, and real-time order tracking.

EDUCATION

Bachelor of Engineering, Mechanical Engineering – Ain Shams University, Cairo, Egypt 2019

LANGUAGES

Arabic (Native) | English (Fluent)
