

Khaled Morsi

Full Stack PHP Developer

✉ khaledzaki370@gmail.com ☎ +20 01091507564 • Giza, Egypt [linkedin.com/in/khaledz370](https://www.linkedin.com/in/khaledz370)

Professional Summary

Full Stack PHP Developer with 5+ years of experience designing, developing, and leading production-grade Laravel and WordPress systems. Strong foundation in OOP, SOLID principles, and proven design patterns, with a focus on building maintainable, testable, and scalable codebases.

Experienced in backend architecture, SaaS and multi-tenant platforms, RESTful APIs, authentication and authorization, real-time systems, AI integrations, and mobile application backends. Skilled in system design and performance engineering, including caching, queues, database optimization, indexing, horizontal scaling, and high-availability architectures.

Proven track record of delivering commercial WordPress plugins, open-source packages, and large-scale production systems, alongside expertise in legacy modernization, CI/CD, Linux server management, and secure coding practices. Uses AI-assisted development and prompt engineering to accelerate delivery while maintaining code quality and engineering standards.

Professional Experience

Full Stack PHP Developer, *Codenesslab*

03/2020 – 05/2026 | Cairo, Egypt

- Led backend architecture and system design decisions for scalable Laravel applications and RESTful APIs serving thousands of active users; focused on scalability, high availability, and performance tuning.
- Designed OOP-based domain models following SOLID principles; applied Repository, Service Layer, Factory, and DTO patterns to decouple business logic, improve testability, and simplify maintenance.
- Built and maintained ERP and CRM systems, including multi-tenant CRM architectures with full client data isolation, role-based authorization, and modular customization.
- Implemented secure coding practices across all projects, including JWT and OAuth2 authentication, authorization layers, and data protection mechanisms to safeguard user and client data.
- Optimized and refactored legacy systems to modern Laravel standards; extracted service classes, eliminated duplication, introduced design patterns for improved maintainability and scalability.
- Leveraged AI-assisted coding tools (Claude, OpenCode, GitHub Copilot) and applied prompt engineering techniques to accelerate feature delivery and improve code quality.
- Managed production Linux servers, deployments, SSL security, DNS configuration, and hosting environments using Plesk, Nginx, and Apache.
- Built AI-integrated systems, real-time applications, and chatbot workflows.

- **MyCIC Mobile Application:** Designed system architecture for Laravel backend APIs serving 96,000+ registered students and 20,000+ daily active users. Applied Redis caching, queue-based processing, database indexing/optimization, and Observer pattern for event-driven notifications to support high request volumes and maintain stability during peak periods.
- **We Achieve Mobile Application:** Built Laravel backend systems supporting live challenges, reminders, podcasts, sessions, push notifications, and real-time features.
- **AI Chatbot WordPress Plugin:** Engineered AI-powered live chat plugin with agent workflows, chat queue management, predefined question flows (Strategy pattern), and third-party API integrations.
- **Chatbot SaaS Dashboard:** Developed Laravel multi-user admin dashboard for chatbot client management with module-level permissions and scalable multi-tenant architecture.
- **Optizi / Yalla Buy Store:** Developed and optimized WooCommerce store and built custom WordPress plugin APIs for mobile application integration.
- **WordPress Site Management:** Handled maintenance, security hardening, performance optimization, and troubleshooting for CIC Cairo, Codeness Lab, and IGS Partners websites.

Education

Bachelor of Engineering – Mechanical Engineering, Ain Shams University

2019 | Egypt

Technical Skills

Backend PHP 8+, Laravel 10+, REST APIs, OOP, SOLID Principles	Frontend JavaScript, HTML5, CSS3
CMS & eCommerce WordPress, WooCommerce, Elementor	Databases MySQL, PostgreSQL, MongoDB, Redis
DevOps & Hosting Docker, GitHub Actions, CI/CD, Linux, Nginx, Apache, cPanel, Plesk, aaPanel, HestiaCP	Architecture & System Design Multi-Tenant Systems, SaaS, Real-Time, Caching Strategies (Redis), Queue Architecture, Database Optimization/Indexing, High-Availability, Horizontal Scaling
Security Secure Coding Practices, JWT, OAuth2, Authentication & Authorization, Data Protection, Cloudflare, SSL	Design Patterns Repository, Service Layer, Factory, Singleton, Observer, Strategy, DTO
AI & Productivity AI-Assisted Coding (Claude, OpenCode, GitHub Copilot), Prompt Engineering, AI Integration	

KEY PROJECTS & OPEN SOURCE

AnyPage Header Footer for Elementor, *WordPress Plugin (Personal)*

- Published WordPress plugin enabling per-page custom header/footer templates with Elementor support. Features centralized template management, database-only storage, real-time duplicate validation, and safe theme fallback for all public post types.

Kzdev String Translations for Polylang, *WordPress Plugin (Personal)*

- Lightweight utility resolving untranslatable frontend strings (dynamic cart widgets, checkout fragments, AJAX loaders, JS-injected content). Centralized UI under Polylang Languages menu, MutationObserver real-time engine, CSV import/export, optional AI translation helper, database-only storage.

Ellyentaayzo Store, *WooCommerce + Mobile App*

- Arabic/English WooCommerce store (kitchen, home appliances, bags) with customer mobile app — OTP sign-in, cart, checkout, real-time order tracking.

kz370/jwt-auth, *Open Source Package*

JWT authentication package for Laravel APIs with token rotation and refresh token flows for secure scalable systems. Built with OOP SOLID design, Service Layer and Factory patterns.

KEncrypt, *Open Source PHP Extension*

PHP extension for encrypting and obfuscating source code in production-critical environments.

kz370/krayin-multi-tenancy, *Open Source Package*

Multi-tenant architecture package for Krayin CRM enabling scalable deployments and secure client data isolation. Implements Strategy pattern for tenant resolution, Repository pattern for data access.
